We Are *United* Under One Name

Community Psychiatry and MindPath Care Centers have united to become Mindpath Health. Our mission to increase access to mental health care that helps people thrive. We do this by empowering our clinicians, investing in our people and caring for the communities we serve.

MINDPATH HEALTH

As Mindpath Health, we have combined our national leadership and strengthened our ability to blend human connection with science-based care, providing our patients with more access to quality mental health care.

Our patients and clinicians are at the heart of everything we do, and we will continue to provide an experience with the same commitment and compassion that meets people where they are, guiding them throughout their journey, and empowering them to live their most fulfilling lives.

Our growth has enabled us to harness our evidence-based knowledge and treat patients with a comprehensive range of treatments to address temporary, situational needs and chronic neurological conditions, while enhancing coordination of care and overall patient experience.

Together, with a shared voice and vision, we will champion our mental health patients, lift communities and improve lives. Learn more about our journey to Mindpath Health.
